G-882 Hardware Pack Data Sheet

The Geomatrix G-882 Hardware Pack contains all the essential consumable and replacement items required to support the routine maintenance of a Geometrics G-882 Magnetometer. The kit also includes commonly misplaced components and perishable items, such as sacrificial anodes, ensuring operators have the necessary parts readily available when carrying out servicing or field maintenance.

Designed to minimise downtime and improve operational efficiency, the hardware pack provides a convenient, cost-effective solution for keeping your G-882 fully operational and mission-ready.
